

How to use our Tweezers

1. Determine Your Eyebrows Starting Point

Hold a straight edge, such as a pair of tweezers or a eyebrow pencil, vertically along the side of the bottom of your nose (along the nostril). Make sure that the line touches the outermost edge your nose and the inside of your eye. The point where line and your eyebrow meets should be the starting pint of your eyebrow. Mark this spot with a eyebrow pencil and repeat for the other eye, making sure space above the bridge of your nose is centered between both starting points. Remove the stray hairs that fall in between.

2. Determine Your Eyebrows Arch Point

Looking straight ahead at the mirror, hold the straight edge at an angle so that it lines up with the outermost edge of your nose and the outermost edge of your iris. The spot that the line intersects your eyebrow's top border is where the peak of your arch should begin. Mark the point with your eye pencil, then remove a row of hairs along the bottom, to enhance your arch. After the peak, shape the tail. Repeat with the other eye.

3. Determine Your Eyebrows End Point

Again, holding the line at an angle from the outermost edge of your nose to the outer most edge of your eye. This is where the eyebrow should end, mark this spot with your pencil, remove the strays beyond this line and repeat with the other eye.

4. Determine Your Brow Thickness

Use your pencil to draw a line just below the fullest part of your eyebrow. I recommend following the natural curvature of your eyebrows. You should end up with a 1/4" – 1/2" brow at it's thickest point. Pluck all the strays below the line and all strays above your eyebrow.

Waxing Eyebrows

The best type of wax for eyebrows is a cream wax heated up in a wax pot. These waxes are the most gentle and are great for the delicate, sensitive eye areas. Also, I recommend purchasing pre-cut strips for eyebrows.

Before you start, you will need you need to decide on the shape of your brows and pull or pin-back hair (so you can see your eyebrows clearly). Pre-heat your wax and make sure you have access to a large mirror (not a hand-held). Your should wax you eyebrows in 4 stages as highlighted to the right.
